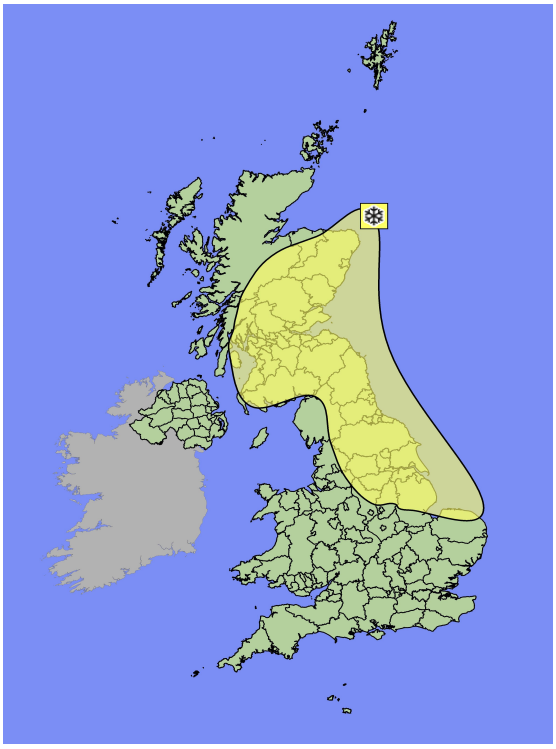
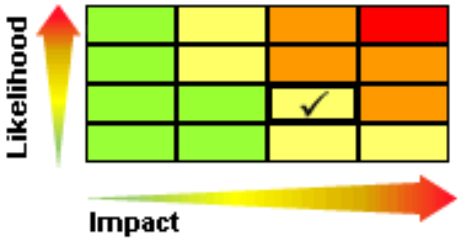
National Severe Weather Warning Service





Chief Forecasters Assessment
A frontal zone affecting much of northeastern England and eastern and southern Scotland for much of Monday. This frontal zone will lead to snow inland with accumulations of 5-10 cm possible above 200 m and in excess of 20 cm above 300 m or so. Blizzards are also likely over high ground. Meanwhile, over lower-lying eastern coastal areas, a mixture of rain, sleet and snow is expected so any accumulations here are expected to be small and patchier in nature. Strong easterly winds may also lead to over-topping of waves in some eastern Scottish coastal areas.

The Met Office have issued a **Yellow Warning** of **Snow**

Valid from **00:05 on Mon, 21st Jan 2013** until **23:59 on Mon, 21st Jan 2013**

A band of snow is affecting parts of eastern and northern England as well as parts of southern and eastern Scotland during Monday. Over lower lying eastern coastal areas accumulations are expected to be small whilst inland accumulations of 2-5 cm are widely expected. Above 200 m in excess of 10 cm is possible. The public should be aware of the risk of disruption to travel.
This warning has been updated to include more of southern Scotland.
